**Amendments to the Specification**

Please replace the paragraph beginning on page 37, line 20 with the following amended paragraph:

Alternatively, the digital photo information alternatively can be stored on the indicator 112 or 112A and transmitted by the transmitter/receiver ~~178278~~ thereof. The digital photo is transmitted to the medical device 14 when the medical device 14 has been associated with the patient 110.

Please replace the paragraph beginning on page 42, line 5 with the following amended paragraph:

In another embodiment best understood with reference to ~~FIG.~~FIGS. 4A, 15 and 21, the medical device 14 is designed to act as a web server for the input device 32 or other similar devices within proximity to the medical device 14. In this embodiment, medical device 14 is equipped to supply the input device 32 web browser with medical device related information as well as non-medical device related information such as task lists, etc. Additionally, the medical device 14 displays a dual function screen having both a pump monitor screen portion and a web browser screen portion. Further, supplying the medical device 14 as a web server permits a remote web browser to associate with the medical device 14 to configure the medical device 14 or run diagnostics on the medical device 14.
